INFINITY
COOLMASTER

COOLING-AS-A-SERVICE (CAAS)

A new, efficient chiller plant. No upfront investment.

Infinity CoolMaster designs, finances, installs, operates and maintains high-efficiency chiller plants for factories and buildings in Thailand. You pay for cooling from the energy you save.

THE CONTRACT AT A GLANCE

Upfront investment	**฿0**
Guaranteed energy saving	**At least 10%, in writing**
Contract term	**5–10 years**
Savings verified	**Monthly, IPMVP-aligned**
Plant monitoring	**24/7**
Owns and maintains the plant	**Infinity CoolMaster**
At the end of the contract	**Renew or take ownership on agreed terms**

WHO IT IS FOR

Factories · Hospitals · Hotels and resorts · Shopping malls · Office buildings · Data centres

FIRST PROJECT

Our first Cooling-as-a-Service plant, for Platinum Pro Plastic in Rayong, is in testing and commissioning in November 2026.

HOW IT WORKS

1. **Free audit**
   We review 12 months of bills and survey the plant.
2. **Written proposal**
   Baseline, guaranteed saving and contract terms.
3. **We invest and install**
   Around your operating schedule.
4. **We operate, 24/7**
   CPMS with machine learning optimises chillers, pumps and towers.
5. **Verified every month**
   Savings measured against the agreed baseline.

WHY OWNERS CHOOSE IT

- Capital stays in the core business.
- One partner is responsible for performance and operation.
- Our fee follows measured savings, so the performance risk is ours.
- Monthly, auditable reports support energy and ESG reporting.

Savings figures are confirmed by a site audit and set in a written proposal.
